EXPERIENCE

Founder & Full-Stack Developer

BagaLAB — Freelance, Spain 2026 — Present

Custom web development, management systems and AI solutions for businesses and marketing agencies, acting as a white-label technical partner.

Front-End Developer

Heymondo — Remote, Barcelona 2023 — Present

Development of travel insurance products using Vue.js, Nuxt, Laravel and TypeScript, including partner portals, websites, internal dashboards and SEO.

Front-End Developer — Repsol project

Accenture / Excelia — Remote, Madrid 2022 — 2023

Power BI data portal with authentication and role-based access, plus a Chrome extension connecting the portal with Power BI.

Full stack Developer

Box2box — Madrid 2020 — 2022

Vue.js and Django microservices, websites, customer interfaces and back-office systems; integrations with Odoo and HubSpot, order automation via webhooks, and Google Cloud automation.

SELECTED PROJECTS

Logistics Management System — DTM

Vanilla JS · Supabase · PostgreSQL

End-to-end custom system for a transport company, including an operations dashboard, a mobile app for the team, automated notifications and reporting. It centralised the company's entire operational workflow.

Bordilandia Park — Booking & Payments

HTML · Ticket Tailor · Stripe · Payment integration

Redesign of an existing website, with the implementation of online booking and a complete payment flow for a leisure park, fully customisable and manageable by the client.

Repsol Data Portal & Extension

Vue.js · Microsoft Power BI · AI API · Chrome Extension

For an enterprise client in the energy sector (via Accenture): a portal integrating Power BI with role-based access, including an AI-powered information assistant, plus a browser extension for seamless data navigation.

SKILLS

Frontend

Vue.js, Nuxt.js, TypeScript, JavaScript, HTML & CSS, Tailwind

Backend & Database

Node.js, Python, Flask, PostgreSQL, SQL, MongoDB, Firebase, Supabase, REST APIs
